Solutions and visions for conveying and storage technology

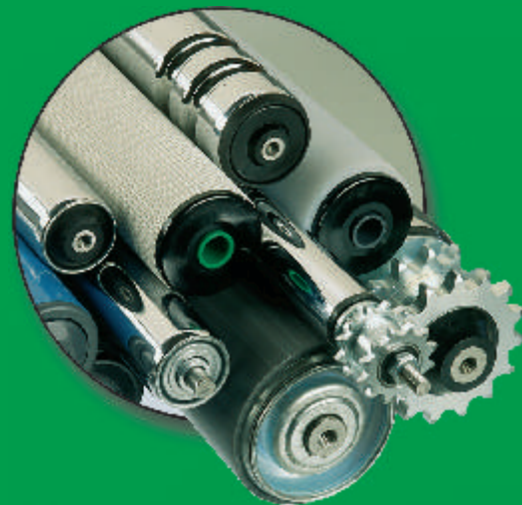

Solutions and visions for conveying and storage technology

Rollex Fördererlemente GmbH & Co. KG is a successful supplier of conveying equipment to the German and international markets. Rollex Fördererlemente has now been developing and producing conveying equipment and zero pressure conveyor systems since 1972. With its sights set on the benefit to customers, and with a finger on the pulse of the modern age, Rollex products satisfy all the demands placed on modern storage and conveying systems.

- 1973 The Rollex Group founded in Remscheid
- 1975 Relocation to Werne - Dortmund.
The company's headquarters
- 1978 Construction of a new production hall at the Werne site
- 1995 Commissioning a production site in Ebersdorf [Thüringen]
- 2001 Extension of the Ebersdorf production site to a working area of 4,200m² (45,000sqft.)
- 2003 Modernising and extending the Werne site with an additional 500 m² (5,000 sqft.), to a total area of 4,800 m² (52,000 sqft.)
- 2004 Opening the production site in the USA
- 2005 Opening a variety of branches in Europe

Rollex Fördererlemente GmbH & Co. KG at present has 80 employees working on a productive area of about 11,000 m² (118,000 sqft.). Regular customers are found all across the world, and production is carried out with machines that use the latest technology.

»I most like to remember the future«

"I most like to remember the future."
These words from Salvador Dali is exactly what we are thinking. We have only two goals when we develop innovative products: finding the best possible solution to your problem, and leaving you with a good memory.

As a successful company, our work is always oriented around the future and around growth. And has been for more than 30 years. Our customers are numerous and varied, yet they have one thing in common: they have confidence in the reliability and the co-operation that they can expect from the Rollex Group.

Rollex conveying equipment is used in the automobile, chemical, textile, foodstuffs and electronic industries.

Dedication, flexibility, and open-mindedness lead to the development of forward-looking products. Rollex is working industriously at three production sites on new developments and on improvements in detail - with a consciousness of costs, and an awareness of customers' needs.

The Rollex Group is therefore in the best possible position to continue to satisfy your demands, now and in the future. We look forward to tomorrow.
